Nuts are Good Buffalo Peanuts

Taste: These seasoned peanuts looked kind of like mini-chicken nuggets, with a rough, irregular texture covering almost the entire peanut, with the same orange color as Buffalo wings. Upon first biting in, there was mostly the sugary taste of honey-roasted peanuts, but a hotter Buffalo sauce taste followed. The coated nuts were moist, and the peanuts inside were soft and tasty. Some of our tasters were scared off by the look of these, or thought the name was too weird. But most of those people actually liked the taste once they took the plunge and tried them.

Aroma: Smells just like Buffalo wings.
